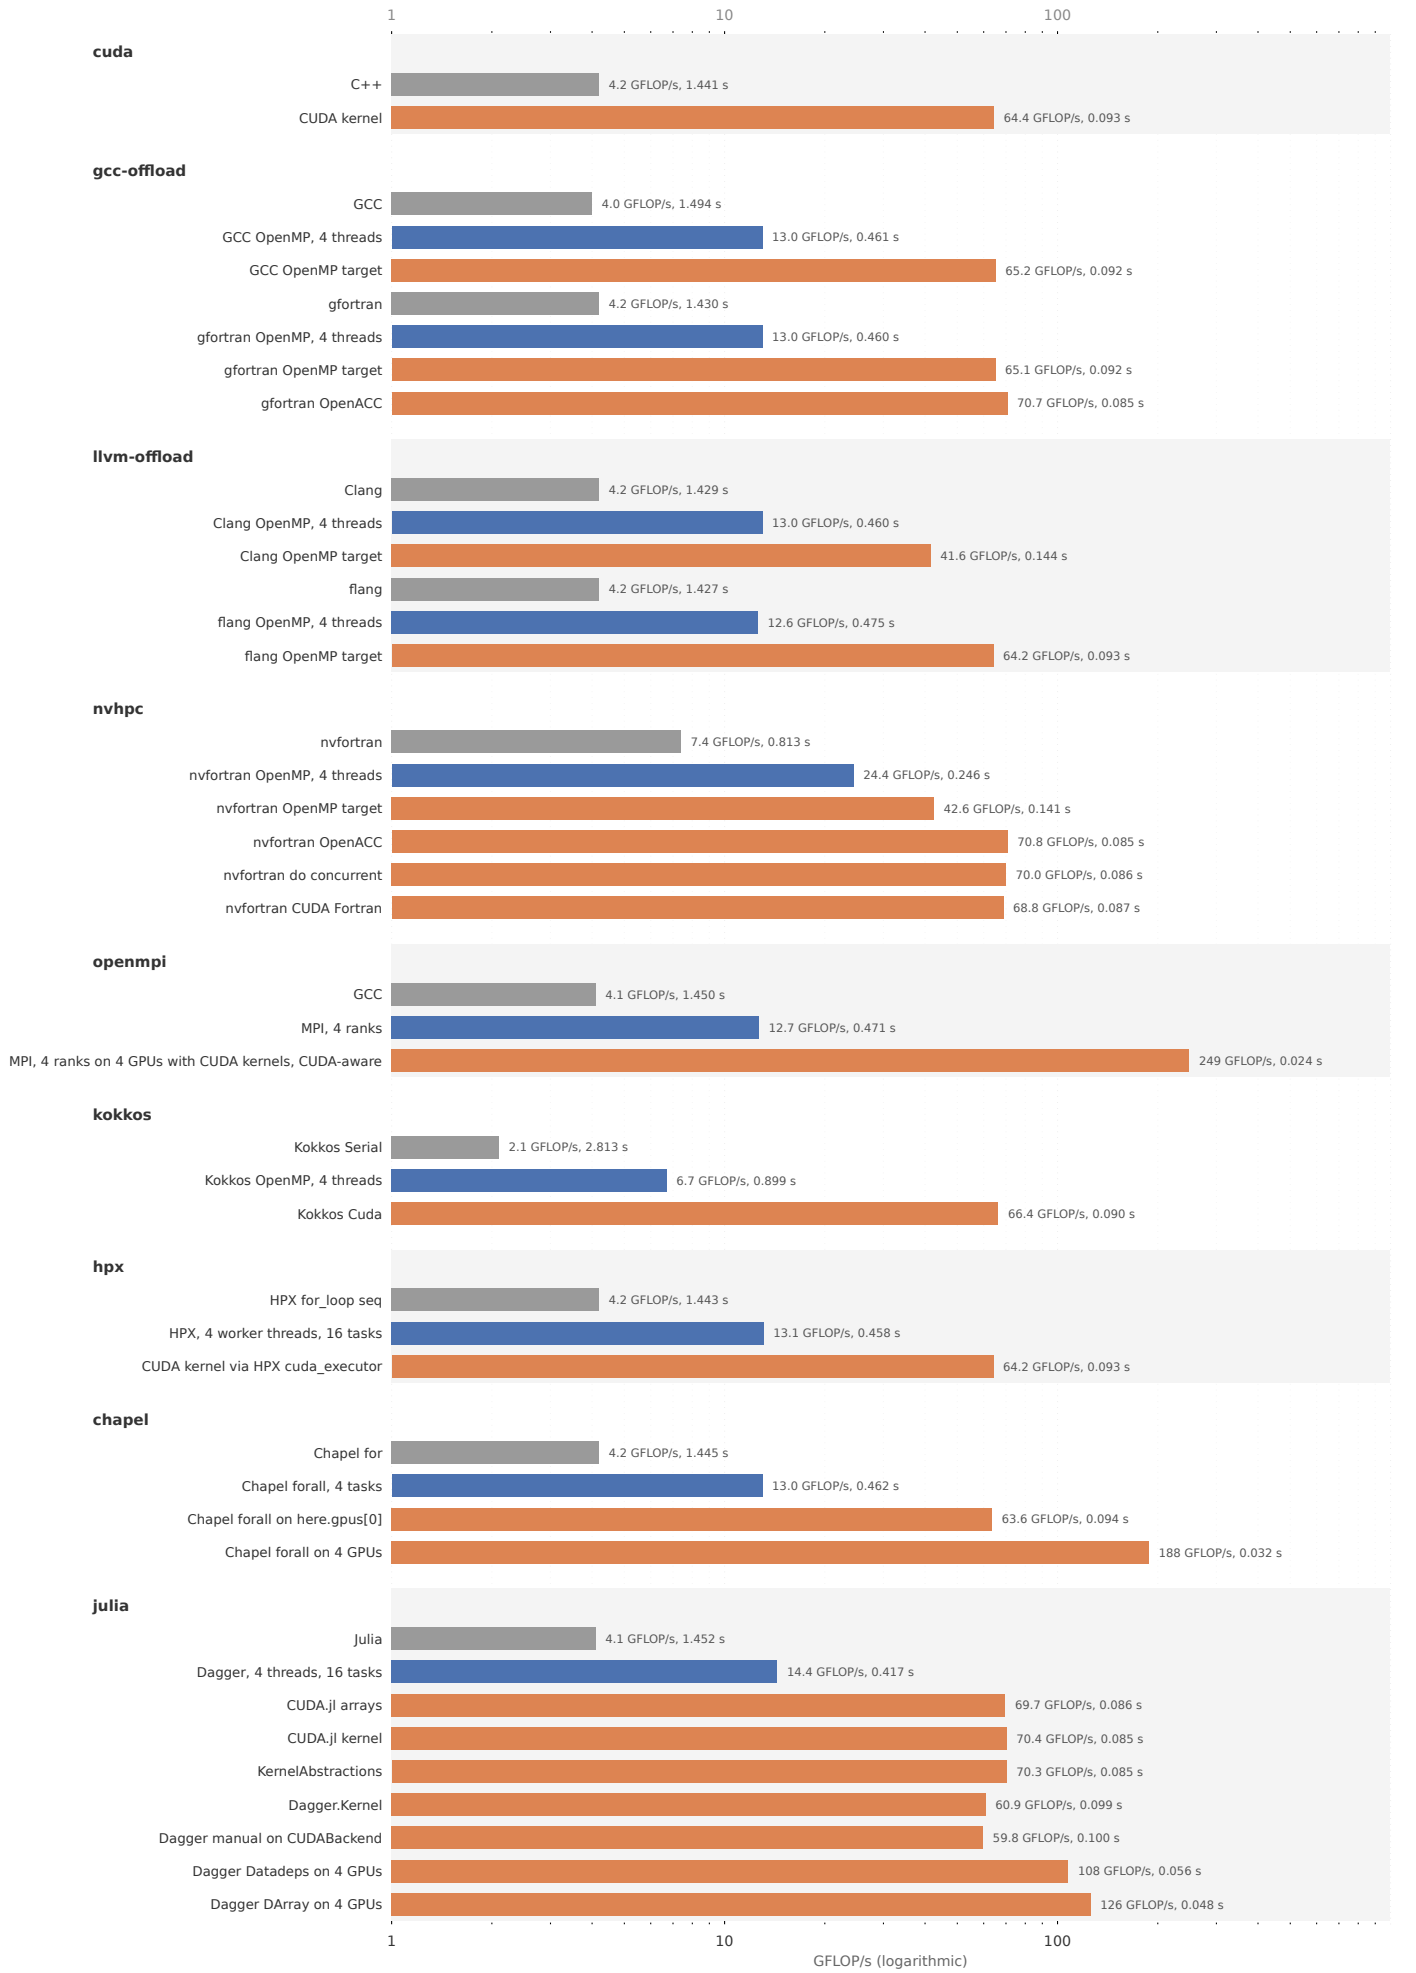
π by the midpoint rule

10^9 steps in double precision, 6 floating-point operations per step

4x NVIDIA GeForce RTX 3070, 4 CPU cores, 2026-10-18, median of 3 runs

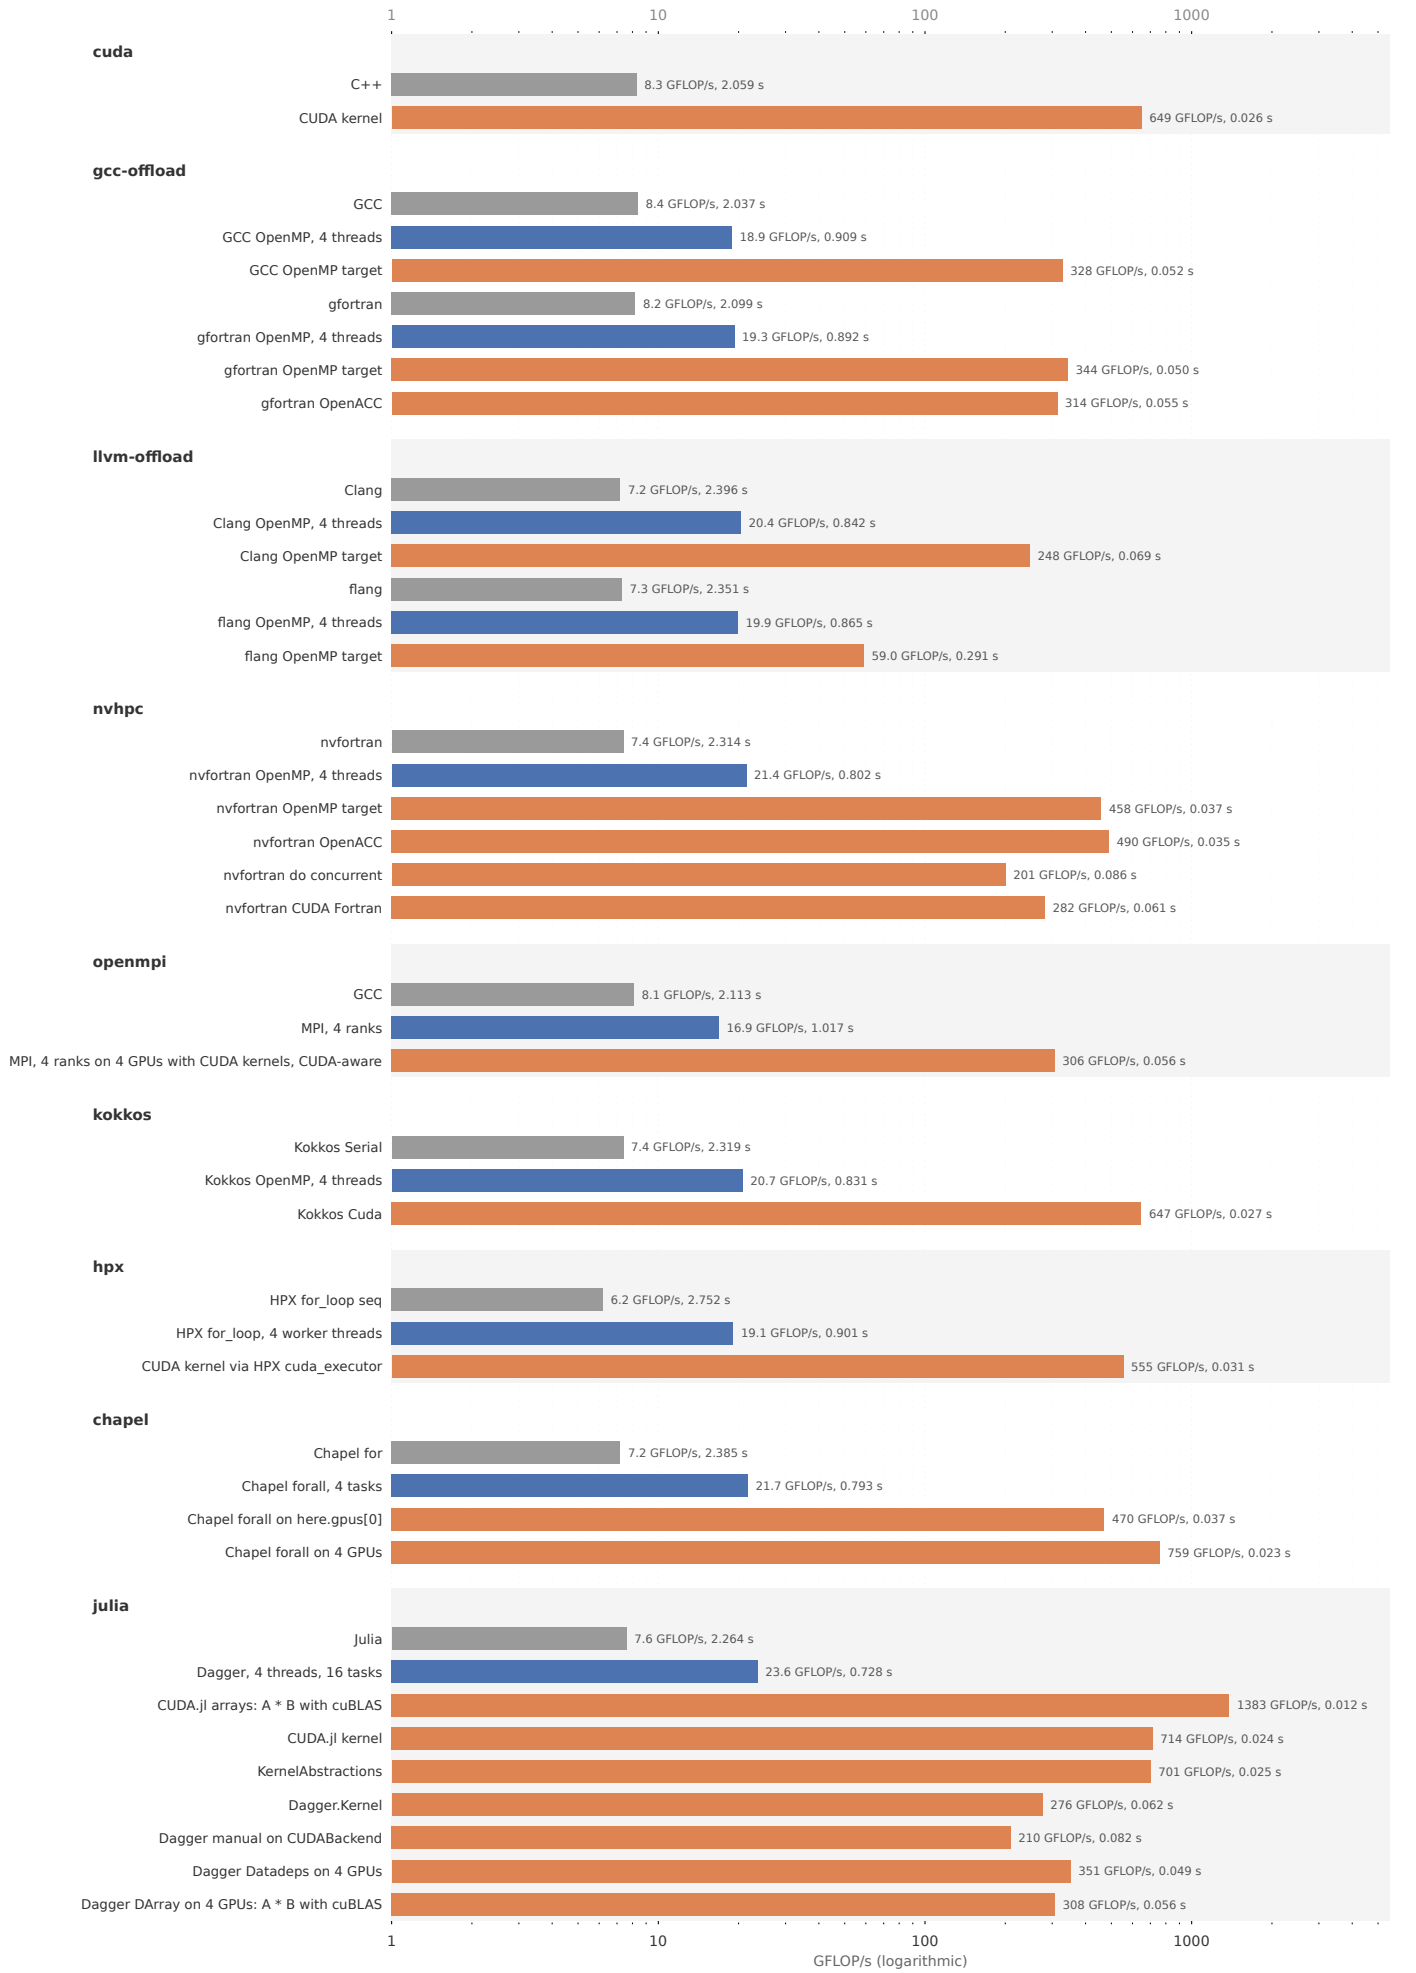


GPU times include allocating GPU memory and the transfers to and from the GPU.

Matrix product C = A·B

two 2048 × 2048 matrices in single precision, the same simple algorithm everywhere

4x NVIDIA GeForce RTX 3070, 4 CPU cores, 2026-10-18, median of 3 runs



GPU times include allocating GPU memory and the transfers to and from the GPU.
